Centre des Congrès - Brasília 2 & 3

"Predictive maintenance" (Session for Group A)

Centre des Congrès - Brasília 1

End of the Congress – Day 1

For Social programs, please go to page 13

PLENARY SESSION

Brushes and Artificial intelligence (A.I.) – Kolibree example (interactive toothbrush)

SPEAKER: M. THOMAS SERVAL,
Kolibree Co-Founder and CEO

As a serial entrepreneur, visionary leader and Knight of the Legion of Honour, Thomas Serval is driven by his desire to transform big companies and the daily life of consumers through his disruptive innovations. A former student from l'Ecole normale supérieur and a graduate from l'Ecole Nationale de la Statistique et de l'Administration Economique (Ensaé), Thomas filed his first patent - a Bluetooth barcode scanner - in 2000 and co-founded Baracoda the year after. After a stint at Microsoft and Google, Thomas is now fully focused on developing Baracoda and its star product, Kolibree, which aims to improve oral hygiene with its innovative and connected solutions. Since this year, the Colgate Smart Electronic Toothbrush E1 is the first Powered by Kolibree toothbrush, sold in Apple Stores in the US and in Europe.

PARALLEL INTERACTIVE AND EXPLORATIVE SESSIONS

Digital fabrication and prototyping a click away

SPEAKER: LÉA MALEH

It has never been so simple, fast and inexpensive to prototype. During this pragmatic workshop, the speaker:

- Will give you an overview of the different online prototyping platforms,
- Will show you how to choose the prototyping technology, via a live demonstration
- Will introduce the different 3D modeling programs and share how to find an online provider to model your prototypes

ABOUT THE SPEAKER

Graduate of Fine Arts, **Léa Maleh** has been working and evolving in the world of design for more than 10 years. Passionate about what she calls craft 2.0, she has successively learned different techniques of 3D printing and digital milling. As a designer, she has for several years been interacting with dozens of digital manufacturers that she regularly contacts for her creations or her clients.

Predictive maintenance

SPEAKER: GUILLAUME LE VÉZOUËT

Anticipate a breakdown, control the shutdown of the machines, increase their service life, reduce the stocks of spare parts...

During this pragmatic workshop, the speaker:

- Will introduce the digital mutation of the industry and present the concepts of Predictive Maintenance and Industry 4.0
- Will present the various digital technologies, through the presentation of use cases
- Will discuss with participants about their own cases

ABOUT THE SPEAKER

Guillaume Le Vézouët is in charge of sales and marketing development at CYM. He has carried out numerous consulting and training missions in access to innovation through IoT. Maintenance is a real productivity lever for all manufacturers; its mission today is to support the realization of predictive maintenance projects.
