Liquor Aging Kit by Viski®

Liquor loves wood. Oak aging provides the unique color, flavor and aroma that we associate with fine spirits. The Liquor Aging Kit by Viski works by exposing smaller amounts of liquor to a larger charred oak surface area. Attach one of the charred oak sticks to the integrated pour spout and insert in your chosen bottle of liquor. Flavor change will be noticeable after one day, but we recommend aging for at least 1 and even up to 6 weeks.
